Whether it is a corporate building, office etc. Door Access Control System has been widely used in the world. Today, even residential areas are adopting this system. The main reason is not to adapt to the current trend, but as an added security to enter your premises. This eradicates the worrying of copied or lost door keys as you will need a password in order for you to enter your doorstep.

At Progressvest Sdn Bhd, with our top quality door access control & intercom system, you need not worry about your entrance anymore, as you will know who has access to your premises and for those who don't, you can view them through the intercom system.

Some of our popular models are:

- Soyal RFID Door Access System
- Fingertec Access System
- Belco Access System
